

Nutrient Project

Name _____ Team _____

Nutrient _____

A 8. Demonstrate essential understanding of basic health concept.

4 Exceeds	<ul style="list-style-type: none"> • Visual is highly creative and very effective as teaching aide • Detailed and accurate description of what the nutrient does in the body • Complete list of foods rich in the nutrient • Detailed and accurate description of what happens when you are nutrient deficient • Detailed and accurate description of what happens when you consume to much of the nutrient
3 Meets	<ul style="list-style-type: none"> • Visual used to teach the class is creative and captures the viewer attention • In a student's own words he/she has clearly and completely explained what the nutrient does in the body • Full list of foods rich in the nutrient • In own words explains what happens if you are nutrient deficient • In own works explains what happens if you consume too much of this nutrient
2 Partially Meets	<ul style="list-style-type: none"> • Visual is somewhat effective in capturing viewer's attention • Attempts to describe what the nutrient does in the body • Incomplete list of foods rich in nutrient • Describes only one: what happens if there is too much or too little in the diet
1 Does Not Meet	<ul style="list-style-type: none"> • Visual is not successful in capturing viewers attention • Weak description of what the nutrient does in the body • Limited list of foods rich in nutrient • Does not tell what happens if there is too much or too little of the nutrient in the diet.
