

Substance Abuse Project

A3. Analyze the effects of risky behaviors (e.g. tobacco, alcohol, and marijuana) have on personal behavior.

Directions: Inform your friends about one of these drugs: tobacco, alcohol or marijuana, by creating a poster. Your poster needs to clearly explain how the body is effected by the drug, why kids use the drug, what is a positive consequence for not using, and a negative consequence for using.

4	<ul style="list-style-type: none">• Poster is highly creative and effective at capturing the viewer's attention.• Detailed and accurate description of 2 effects of the drug on the body.• Detailed description of 2 reasons why kids use.• Detailed description of 1 positive consequence for not using drug• Detailed description of 1 negative consequence for using the drug.
3	<ul style="list-style-type: none">• Poster is creative and captures viewer's attention.• Clearly describes 2 effects of the drug on the body.• Explains 2 reasons why kids use.• Explains 1 positive consequences for not using drug.• Explains 1 negative consequences for using drug.
2	<ul style="list-style-type: none">• Poster is somewhat effective in capturing viewer's attention.• Attempts to describe 2 effects of the drug on the body.• Describes one reason why kids use• Describes one consequence for using the drug.
1	<ul style="list-style-type: none">• Poster is not successful in capturing viewer's attention.• Weak description of how the drug effects the body.• Does not explain why kids use or consequences for using the drug.
